

Career Labs Vision

Career Labs helps students find a vision for a successful career and provides connections and training to make their visions possible. We do this by building partnerships between employers, professionals and schools in communities of need to help students succeed in life

Our Program

How You Can Help

How can a student have a dream if they don't know what is possible to dream about? As a Career Labs Volunteer you will help students discover a future and hope for their lives. You will be a role model. You will be a guide for them in learning about career opportunities and life skills.

Volunteer Opportunities

Workshop Mentor

- Assist students as they work through hands-on workshop exercises in a different career field each week
 - Guide them through workshop exercises
 - Assist with event production
